HELPFUL HINTS TO HOUSEWIVES

Conducted by AUNT SUSAN
Have you a recipe that you have found valuable—do you know a short-cut way to do a hard task—send it to us and we will publish it and thus let others benefit from same. If preferred, name of writer will not be published.

To Take Out Paint.
Equal parts of ammonia and turpentine will take paint out of clothing, no matter how hard or dry it may be. Saturate the spot two or three times and then wash out in soapuds.—W. L. P.

When Traveling.
Any one who travels much will find it better to pack as much as possible in pasteboard boxes which fit the trunk well. Thin starched pieces which muss so easily are kept from wrinkling in this way. If the boxes are labeled "Waists, Skirts," "Fancy-work," etc., it will save opening the wrong boxes when one is hurried.—A. Traveler.

For Children's Parties.
For children's parties these dainties will be found popular, and are wholesome and simple to prepare. Purchase white or graham animal crackers and coat them in various colored icings. They may be dipped in white, pink, chocolate, or other desired frostings.—Mrs. G. A.

Buttonhole Help.
To make buttonholes on thin material, before cutting the buttonholes, make a piece of India linen or muslin underneath where the buttonholes are to be. Cut the buttonholes through both and work. When finished, cut away the piece of goods underneath close to the work, and the result is a good firm buttonhole.—I. M.

Protection for Wall Paper.
While cleaning map boards the wall adjoining may easily be protected by using a piece of cardboard held at the upper edge of the board. This allows the cleaning cloth to soil the cardboard instead of the wall, and avoids that streak one so often sees on wall paper or painted walls.—Mrs. C. W. P.

Home-Made Shirtwaist Boxes.
For shirtwaist boxes, to hold children's toys, for wood boxes, etc., get a box of the desired size and hinge on the lid. Cover the box with matting and around the top and bottom of the box tack half-inch, half-round molding to cover the rough edge of matting. Then cover the lid with matting and put molding on the

Mixed Vegetable and Egg Salad.
One cupful shredded stringbeans, 1 cupful peas, 1 cupful shredded cucumber, 1/2 cupful sliced radishes, watercress, lettuce heart, 6 hard-boiled eggs, radish-roses and parsley. Mix together the peas, beans, cucumber and sliced radishes and let stand in a cold place for 30 minutes to marinate in French dressing. Halve the hard-boiled eggs lengthwise, cut off the lower ends so that they will stand upright, and dip each one in a little tart lemon jelly; have the salad plate very cold and arrange these egg-halves in a circle. They should stick at once if the jelly mixture contains enough gelatin. Fill in with the vegetable mixture, top with a lettuce heart and garnish with parsley and radish-roses. Pass mayonnaise dressing.

"What in it, doctor?"
"Your tumblers—do you sterilize them thoroughly?"
"Oh, yes."
"And your oysters—do you serve them on sanitary shells?"

Brown—"The boss says that when he was a boy on the farm they had a mule that was just like one of the family."
Jones—"Yes, and I know which one."—Judge.

The Exclusive System of Tone Control—

Perhaps the most outstanding feature of the Columbia Grafonola is the superb flexibility of tone made possible by the dual system of tone-control "leaves" adapted from the principle of tone-control that can make a great church-organ's voice die down to almost a whisper, or ascend in a thundering grand chorale.

This principle is firmly established as the one authentic method of tone-control. Musicians agree that it cannot be supplanted—or even approached—by mechanical means of modulating the volume of sound in musical instruments; therefore the Columbia Grafonola possesses an exclusive and vital advantage over all similar types of instruments.

Thousands Have Discovered Dr. Edwards' Olive Tablets are a Harmless Substitute

Dr. Edwards' Olive Tablets—the substitute for calomel—are a mild but sure laxative, and their effect on the liver is almost instantaneous. They are the result of Dr. Edwards' determination not to treat liver and bowel complaints with calomel. His efforts to furnish a harmless substitute for these little olive-colored tablets.

These pleasant little tablets do the good that calomel does, but have no bad after effects. They don't injure the teeth like strong liquids or calomel. They take hold of the trouble and quickly correct it. They cure the liver at the expense of the teeth! Calomel sometimes plays havoc with the gums. So do strong liquids.

It is best not to take calomel, but to let Dr. Edwards' Olive Tablets take its place. Most headaches, "biliousness" and that lousy feeling come from constipation and a disordered liver. Take Dr. Edwards' Olive Tablets when you feel "lousy," "bilious" and "heavy." Note how they "clear" clouded brain and how they "perk up" the spirits. At 10c and 25c per box. All druggists.

A Sensible Cigarette

A Little Blossom To Delight the Home

When it is known that in the near future the home is to be blessed with a new arrival the first thought should be "Mother's Friend." This is an external remedy gently applied over the stomach muscles. It makes them firm and pliant; they expand naturally without undue strain. It removes from the nerves those influences which are responsible for much of the pain incident to the period of expectancy. It is for this reason that much of the distress such as morning sickness is avoided. All prospective fathers should see to it that the expectant mother is provided with a bottle of "Mother's Friend."

The directions are simple. Get it at any drug store. It is applied by the expectant mother herself. It penetrates deeply and affords quick and splendid relief in a most gratifying manner and reflects a physical betterment to the nervous disposition of the baby. Don't fail to get a bottle of "Mother's Friend" today and then write Bradford Regulator Co., 418 Lamar Bldg., Atlanta, Ga. for a pretty little book brimful of information for expectant mothers. It is a delight to read it.
